SUMMARY

A passionate and self-taught Flutter Developer with expertise in building high-performance, cross-platform applications for iOS, Android, web, and Windows platforms. I have a strong foundation in state management, backend integration, and creating intuitive user experiences.

SKILLS

Frameworks & Languages: Flutter, Dart, Nodejs, HTML, CSS, JavaScript.

Database: Firebase, Hive, RESTful APIs.

Tools: Visual Studio Code, Android Studio, Git, GitHub, Postman.

Architecture: Clean Code Architecture, MVVM.

State Management: Provider, BloC, Riverpod.

UI/UX: Responsive Ui Design, Flutter Animation, Canva.

PROJECTS

Caffely

Coffee shop Application | [View on GitHub](#)

A modern coffee shop application designed to provide a seamless and enjoyable coffee ordering experience for users.

- Key features include easy buying, add-on customization, user authentication, secure Stripe payment processing, and an in-app wallet. Integrated Google Maps for automatic address selection, real-time order tracking, and nearby coffee shop discovery.
- Integrated Firebase for real-time data synchronization and secure storage.
Utilized Riverpod for state management and Google Maps API for location-based services.

CometChat

Advanced Chat & Calling Application | [View on GitHub](#)

A modern chat application designed to provide a seamless and interactive communication experience for users.

- One-on-One & Group Chat – Connect with friends and communities through private and group messaging.
- Voice & Video Calling – Voice and video calls for instant communication with agora.
- Status Updates – Share moments with text, images.
- Real-Time Messaging – Built using Firebase for fast and reliable communication..
- Secure Authentication – User authentication with Firebase for safe and easy access.
- Media Sharing – Send images, videos, and documents effortlessly.
- Customizable UI – Sleek and intuitive design for a user-friendly experience.
- State Management – Utilized BLoC for smooth and efficient app performance.
